New Zealand Department of Agriculture.

THE NEW ZEALAND JOURNAL OF AGRICULTURE.

VOL. XXXVI.

(JANUARY-JUNE, 1928.)

Published by direction of
The Hon. O. J. Hawken,
Minister of Agriculture.

Editor: R. H. Hooper.

WELLINGTON.
BY AUTHORITY: W. A. G. SKINNER, GOVERNMENT PRINTER.
1928.

THE NEW ZEALAND
JOURNAL OF AGRICULTURE.

VOLUME XXXVI.
(January–June, 1928.)

INDEX.

A.

Actinomycosis, 21.
African boxthorn for Central Hawke's Bay, 370.
Agricultural club, boys' and girls', competitions: Dominion challenge shield, 439.
Agricultural legislation of 1927, 18.
Agricultural shows, season 1927–28, 134.
Agrostis tenuis on North Island hill country, 1.
Amaranthus retroflexus, 44.
Answers to inquiries, 71, 147, 218, 294, 369, 439.
Ant-nests on bowling-green, 219.
Apiaries Act, 1927, 21.
Apiary, the (monthly notes), 60, 131, 212, 285, 363, 430.
Apples, flesh-collapse in, 88.
Apples and pears, export of, 1928 season, 138.
Arthritis in lambs, 47.
Aston, B. C.—
  Mineral content of pastures: Progress of the New Zealand investigation, 22, 75.
  Iron-starvation (bush sickness) in stock: Farmers' experience with advised remedies, 316, 402.
Atkinson, Esmond.—Weeds and their identification, 44, 201.
Autumn-bearing strawberries, 147.

B.

Banks Peninsula Rabbit District, 70.
Barley, feeding of, 258.
Barleys in Marlborough, 95.
Barley, wheat, and oats, estimated yields of, 148.
Beans and peas, feeding of, 259.
Blackberry pest, the: Biological control—insects and fungi, 261.
Black loganberry, so-called, 203, 318.
Boulder drains, 369.
Boys' and girls' agricultural club competitions: Dominion challenge shield, 439.
Boxthorn, African, 370.
British Phosphate Commission's business, 244.
Brown, F. C.—Poultry-keeping, 58, 128, 209, 283, 361, 427.
Brown-rot in stone-fruits: Experiment at Henderson, 1927–28, 419.
Brown-top on North Island hill country, 1.
Burdizzo crusher or pincers, use of, 172.
Bush sickness (iron-starvation) in stock, 316, 402.

C.

Calcium cyanide, fumigation of vineries with, 192.
Calf-marking: The movement in New Zealand, 116.
Campbell, J. A.—So-called black loganberry, 203, 318.
Castration wound in horse, trouble with, 440.
Canterbury Agricultural College, plant-breeding at, 156.
Cattle, classification of in New Zealand, 252.
Cattle, importation of from United States, 222.
Census and Statistics Office—
  Statistics of top-dressing on farms, 183.
  Irrigation statistics, 203.
  Statistics of farm machinery and engines, 315.

Cereals, cross-breeding of, 163.
Cereals, selection work in, 157.
Certification of seed potatoes : Operation of the system in season 1927–28, 324.
Certification of seed wheat : Inauguration of system in Canterbury, 223.
Cheap seed-mixtures : A warning, 188, 337.
Checking of milk and cream tests and cream grading, 115.
Chemical research, New Zealand, 51.
Chemistry Section.—Importation of fertilizers, 1927–28, 435.
Choking in cattle, 243.
Citrus-culture (monthly notes), 57, 128, 208, 282, 360, 426.
Classification of cattle in New Zealand, 252.
Clover, red, selection in, 171.
Cream and milk tests and cream grading, checking of, 115.
Creosote, preserving fence-posts with, 36.
Cocker, L. W. C.—
A new perch for poultry-houses, 275.
A new drinking-water system for poultry-houses, 416.
Cockayne, L.—Review : Eucalypts in New Zealand, 289.
Common ailments of live-stock and their treatment, 240, 319.
Corrections, 71, 148, 193.
Control of brown-rot in stone-fruits : Experiment with peach-trees at Henderson, 1927–28 season, 419.
Control of spurrey or yarr, 148.
Control of tomato mildew : Trials in Auckland District, season 1927–28, 99.
C.O.R. system in 1927, review of, 227.
Contagious mammitis, incidence of, 111.
Cows, dairy, foot trouble in, 218.
Cow-pox (Variola vaccina), 321.

D.

Dairy cattle, purebred, export of in 1927, 222.
Dairy cows, purebred, testing of in 1927, 227.
Dairy cows, testing of purebred (C.O.R. lists), 67, 135.
Dairy cows, diseases of, 377.
Dairy Division—
Testing of purebred dairy cows (C.O.R. lists), 67, 135, 216.
Export of purebred dairy cattle in 1927, 222.
Dairies, urban milk-supply, inspection of, 146.
Danthonia pilosa for hill country grasslands, 297.
Dargaville, experimental farm at, 37.
Deem, J. W.—Marton Experimental Area, season 1927–28, 350.
Deficiency diseases of stock, 51.
Diseases of dairy cows : Extension of Department's investigational work, 377.
Disinfectant in stable manure, 295.
Dixon, C. E.—Prevention of sap-stain in white-pine, 118, 194.
Drains, boulder, 369.

E.

Earp, E. A.—The apiary, 60, 131, 212, 285, 363, 430.
Edwin Hall : Pioneer in rural progress, 422.
Eggs and egg-pulp in cold storage, 370.
Egg settings, transit of, 295.
Ellis, A. E.—Nauru and Ocean Islands phosphate : The industry and its future, 28.
Ensilage, 253.
Estimated yields of wheat, oats, and barley, 148.
Eucalypts in New Zealand (Review), 289.
Export of apples and pears, 1928 season : Conditions of Government guarantee and export regulations, 138.
Export butter weights, 95.
Export of purebred dairy cattle in 1927, 222.

F.

" Fairy rings " in lawns, 218.
Farm, the (monthly notes), 54, 125, 204, 279, 356, 423.
Feeding of live-stock, the—
Nutrients and their functions, 31.
Utilization of nutrients, 82.
Foodstuffs in common use, 184, 253.
Fence-posts, preserving with creosote, 36.
Fencing-wire, straining, 442.
Fireblight regulations, 98.
Fertilizer importations : March quarter, 438.
Fertilizers, importation of in 1927–28, 435.
Fertilizers mixing : " Potash salts," 226.
Fish-meal, 260.
Flesh-collapse in Sturmer apples : Cool-storage experiments, 1927, 88.
Fistula of the teat, 322.
Foodstuffs in common use, 184.
Foot-and-mouth disease in Britain, 74, 124.
Foot trouble in dairy cows, 218.

Foy, N. R.—
Cheap seed-mixtures: A warning, 188.
The Official Seed-testing Station: Record of operations in 1927, 330.
Some points in seed-testing, 420.
Foy, N. R., and McGillivray, R.—The grass-seed industry in Southland, 189.
Fumigation of vineries with calcium cyanide, 192.
Fungicides and Insecticides Act, 1927, 19.
Frost-prevention for orchards: Heating experiments and methods in Central Otago, 382.
Fruit and plants, imported, 50.
Fruit-export Control Board, 215.
Fruit export levy, 95.
Fruit-trees, protection of against hares, 376.

G.

Grasses and clovers for hill country, 1, 297.
Grass mixture for scrub burn, 147.
Grasslands of New Zealand, the: Grasses and clovers for North Island hill country, 1, 297.
Grass-seed industry in Southland, the, 189.
Grasses, selection in, 164.
Gill, D. A., and Hopkirk, C. S. M.—The sorrel-poisoning theory of lamb mortality, 153.
Gill, D. A.—Mortality among young fat lambs: Investigations in 1927 season, 149.
Grape-vines for New Zealand conditions: Recent trial importation of European varieties, 106.

H.

Hadfield, J. W.—
Certification of seed wheat: Inauguration of system in Canterbury, 223.
Certification of seed potatoes: Operation of the system in season 1927–28, 324.
Hall, Edwin, 422.
Hamblyn, C. J.—
Northern Wairoa Experimental and Demonstration Farm, 37.
Top-dressing of North Auckland sandstone hill country, 103.
Hares, protection of fruit-trees against, 376.
Hawthorn hedge, replacing the, 92.
Hay, feeding of, 255.
Hedgehogs for orchard, 294.
Heifer with lumpy jaw, 441.
Hilgendorf, F. W.—Plant-breeding at Canterbury Agricultural College, 156.
Hilgendorf, F. W., and Hudson, A. W.—Wheat variety trials in Canterbury, 378.
Hill country grasslands, 1, 297.
Honey, packing for export, 48.
Honeydew on birch-trees, 294.
Hopkirk, C. S. M.—Incidence of contagious mammitis, 111.
Hopkirk, C. S. M., and Gill, D. A.—The sorrel-poisoning theory of lamb mortality, 153.
Horticulture Division.—Control of brown-rot in stone fruits: Experiment at Henderson, 1927–28, 419.
Horticulture, Institute of, diploma form reproduction, 415.
Horticulture (monthly notes), 64, 132, 213, 287, 364, 431.
Horse with stringhalt, 218.
Hoven in cattle, 241.
Hudson, A. W., Calder, R. A., and Bates, E. M.—Wheat-manuring experiments in Canterbury, season 1927–28, 339.
Hudson, A. W., and Hilgendorf, F. W.—Wheat variety trials in Canterbury, 378.
Hume, A. A., and Tennent, R. B.—Pasture top-dressing experiments in Otago, season 1927–28, 173, 245.
Hyde, W. C.—
Horticulture, 64, 132, 213, 287, 364, 431.
Replacing the hawthorn hedge, 92.

I.

Impaction of the rumen, 242.
Importation of cattle from United States of America, 222.
Importation of fertilizers, 1927–28, 435.
Imported fruit, plants, &c., 50.
Improvement in meat-product processes, 222.
Improvement of *Phormium tenax*: Research on breeding and cultivation of the plant, 112.
Incidence of contagious mammitis: Danger of chronic cases in dairy herds, 111.
Inspection of urban milk-supply dairies, 146.
Institute of Horticulture diploma form reproduction, 415.
International Institute of Agriculture periodicals, 290.
Introduction of Plants Act, 1927, 19.
Inventions of agricultural interest, 70, 215, 366.
Iodine in sheep's diet, 294.
Irrigation statistics, 203.
Iron-ammonium citrate, price of, 404.
Iron-starvation (bush sickness) in stock: Farmer's experience with advised remedies, 316, 402.

J.

Jenks, J. E. F.—Top-dressing of hill-country pastures: Trials on King-country farms, 371.
Jersey heifers at Ruakura State Farm (photograph), 291.

K.

King-country farms, top-dressing trials on, 371.

L.

Lady's thumb, 47.
Lambs, loss of, 369.
Lamb mortality, the sorrel-poisoning theory, 153.
Lambs, mortality among young fat, 149.
Lambs, twin, incidence of, 219.
Lambs, winter lick for, 220.
Land, occupation and utilization of in New Zealand, 296.
Larvæ of sheep nasal bot-fly, 147.
Lawns, "fairy rings" in, 218.
Legislation, agricultural, of 1927, 18.
Lemon-growing, 43.
Lemon-trees, diseased, 71.
Levy, E. Bruce.—Grasslands of New Zealand: North Island hill country, 1, 297.
Liming and manuring of pasture at Winton Experimental Farm: Block 3 results for 1927, 96.
Live-stock, common ailments of and their treatment, 240, 319.
Live-stock, the feeding of, 31, 82, 184, 253.
Loganberry, so-called black, 203, 318.
Loose smut of wheat ("black-heads"), 91.
Lyons, J.—
Use of the Burdizzo crusher, 172.
Common ailments of live-stock and their treatment, 240, 319.
Lombardy poplar cuttings, planting of, 441.

M.

Machinery and engines, farm, 315.
Maize, feeding of, 259.
Mammitis, contagious, incidence of, 111.
Mammitis (inflammation of the udder), 319.
Manuring of early potatoes: Experiments in Auckland Province, season 1927, 408.
Manuring experiments on wheat in Canterbury, 1927–28, 339.
Manuring and liming of pasture at Winton Experimental Farm, 96.
Manure, stable, disinfectant in, 295.
Marton Experimental Area: Notes on operations, 1927–28 season, 350.
McGillivray, R., and Foy, N. R.—The grass-seed industry in Southland, 189.
McGillivray, R.—Liming and manuring of pasture at Winton Experimental Farm, 1927, 96.
McLinden, J.—The feeding of live-stock, 31, 82, 184, 253.
Meat industry research, 338.
Meat-meal, 260.
Meat-product processes, improvement in, 222.
Mueller medal for research, 91.
Meteorological Office.—Weather records, 73, 144, 220, 292, 367, 437.
Milk and cream tests and cream grading, checking of, 115.
Milk by-products, 355.
Milk fever, 322.
Milking-shed, walk-through, details of, 219.
Milking Shorthorns at Ruakura State Farm (photograph), 434.
Milk-supply dairies, urban, inspection of, 146.
Mineral content of pastures: Progress of the New Zealand investigation, 22, 75.
Mixing fertilizers: "Potash salts," 226.
Molasses, feeding of, 259.
Mortality among young fat lambs: Investigations in season 1927, 149.

N.

Nasal bot-fly, sheep, larvæ of, 147.
Nauru and Ocean Islands phosphate: The industry and its future, 28.
Neill, J. C.—
Loose smut of wheat, 91.
Barleys in Marlborough, 95.
New drinking-water system for poultry-houses, a, 416.
New Zealand chemical research: Some recent references abroad, 51.
North Auckland hill lands, top-dressing of, 103.
Northcroft, E. F.—The blackberry pest: Biological control—insects and fungi, 261.
Northern Wairoa Experimental and Demonstration Farm: Establishment and first two years' working, 37.
Noxious-weeds orders, 117, 349.

O.

Oats, feeding of, 257.
Occupation and utilization of land in New Zealand, 1926 and 1927, 296.

Oats, wheat, and barley, estimated yields of, 148.
Official Seed-testing Station, the: Record of operations for 1927, 330.
Orchard heating for frost-prevention in Central Otago, 382.
Orchard, the (monthly notes), 56, 127, 206, 281, 358, 424.
Orchards, registration of, 117.
Orchard-tax Act, 1927, 18.
Otago Central, the plains and river-terraces of, 381.
Otago, pasture top-dressing experiments in, 1927–28 season, 173, 245.

P.

Packing honey for export, 48.
Passion-fruit and its culture, 405.
Pastures, hill country, top-dressing of, 371.
Pasture top-dressing experiments in Otago, season 1927–28, 173, 245.
Pastures, mineral content of, 22, 75.
Patents, agricultural, 70, 215, 366.
Patterson, T. H., and Woodcock, J. W.—Manuring of early potatoes: Experiments in Auckland Province, season 1927, 408.
Pears and apples, export of, 1928 season, 138.
Peas and beans, feeding of, 259.
Perch, a new, for poultry-houses, 275.
Phosphate, Nauru and Ocean Islands, 28.
Phormium industry investigations, 293.
Phormium tenax, improvement of, 112.
Pigweed, 44.
Plant-breeding at Canterbury Agricultural College: Work on cereals, grasses, and red clover, 156.
Plants and fruit, imported, 50.
Polygonum persicaria, 44.
Pope, F. S.—Agricultural legislation of 1927, 18.
"Potato, the" (Review), 72.
Potatoes, early, manuring of in Auckland Province, 408.
Potatoes, seed, certification of, 324.
Potash salts and fertilizers mixing, 226.
Poultry-farming, 27.
Poultry-houses, a new perch for, 275.
Poultry-houses, a new drinking-water system for, 416.
Poultry-keeping (monthly notes), 58, 128, 209, 283, 361, 427.
Preserving fence-posts with creosote, 36.
Prevention of sap-stain in white-pine: Tests by State Forest Service, 118, 194.
Publications received, 442.
Pumice, nature of, 155.

R.

Ragwort moth, the, 349, 401.
Rangitikei Sand-dune Experimental Station, 117.
Replacing the hawthorn hedge, 92.
Registration of orchards, 117.
Reviews, 72, 289.
Rice, W. H.—
Citrus-culture, 57, 128, 208, 281, 360, 426.
Control of tomato mildew in Auckland District, 99.
Passion-fruit and its culture, 405.
Rumen, impaction of, 242.
Rushes in grassland, elimination of, 440.

S.

Sap-stain, prevention of in white-pine, 118, 194.
Seeds importation regulations, 355.
Seed-mixtures, cheap, 188, 337.
Seed potatoes, certification of in 1927–28, 324.
Seed-testing points, some, 420.
Seed-testing Station, Official: Record of operations for 1927, 330.
Seed wheat, certification of in Canterbury, 223.
Seasonal notes, 54, 125, 204, 279, 356, 423.
Shearers' accommodation, 110.
Sheep nasal bot-fly, larvæ of, 147.
Shows, forthcoming winter, 295, 370, 442.
Singleton, W. M.—
Checking of milk and cream tests and cream grading, 115.
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in 1927, 227.
Slaughtering and Inspection Act, 1927, 20.
Smallfield, P. W.—The farm, 56, 125, 204, 279, 356, 423.
So-called black loganberry: A warning, 203, 318.
Southland, grass-seed industry in, 189.
Some seed-testing points, 420.
Sorrel-poisoning theory of lamb mortality, the, 153.
Sows not coming in season, 440.
Spartina grass, 71.
Spear-grass, 201.
Spurrey or yarr, control of, 148.
Stock Amendment Act, 1927, 20.
Stock, deficiency diseases of, 51.
Strawberries, autumn-bearing, 147.
Stringhalt, horse with, 218.
Statistics of farm machinery and engines, 315.
Statistics of top-dressing on farms, 183.
Stock slaughtered, 1927–28, 442.

Stratford, G.—The orchard, 56, 127, 206, 281, 358, 424.
Straw as a foodstuff, 257.
Strychnine, price of for rabbit-destruction, 278.
Sturmer apples, flesh-collapse in, 88.

T.

Tennent, R. B., and Hume, A. A.—Pasture top-dressing experiments in Otago, season 1927–28, 173, 245.
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in 1927, 227.
Testing of purebred dairy cows (C.O.R. lists), 67, 135, 216.
Tobacco-growing (notes), 64, 132, 213, 432.
Tomato mildew control experiments in Auckland District, 99.
Top-dressing of hill-country pastures: Trials on King-country farms, 371.
Top-dressing of North Auckland hill lands: Some experimental results on sandstone country, 103.
Top-dressing statistics, 183.
Top-dressing experiments on pasture in Otago, 1927–28, 173, 245.
Trees from other lands for shelter and timber: Eucalypts, 289.
Tree-planting companies, 27.
Threshings of wheat and oats, 296, 368, 439.
Tung-oil trees, introduction of, 381.
Tympany in cattle, 241.

U.

Udder quarters, undeveloped, in heifer, 370.
Urban milk-supply dairies, inspection of, 146.
Use of the Burdizzo crusher: Bearing on the frozen-meat industry, 172.

V.

Vineries, fumigation of with calcium cyanide, 192.
Vines for New Zealand conditions: Recent trial importation, 106.

W.

Wairoa, Northern, experimental farm, 37.
Walk-through milking-shed, details of, 219.
Warts on the teats, 322.
Waters, R.—Flesh-collapse in Sturmer apples: Cool storage experiments, 1927, 88.
Weather records, 73, 144, 220, 292, 367, 437.
Weeds and their identification—
Pigweed and lady's thumb, 44.
Spear-grass, 201.
Whale-meat, 260.
Wheat, feeding of, 258.
Wheat-manuring experiments in Canterbury, season 1927–28, 339.
Wheat and oats threshings, 296, 368, 439.
Wheat, oats, and barley, estimated yields of, 148.
White-pine, prevention of sap-stain in, 118, 194.
Wheat, seed, certification of in Canterbury, 223.
Wheat-testing, 53.
Wheat variety trials in Canterbury, 378.
